## MOTIF

### **Sarala Pitha (Jhankad)**

Jhankad is the sanctum sanctorum of Goddess Sarala, regarded as one of the most spiritually elevated expressions of Shaktism from time immemorial. Believed as a synthesis of divine figure of Durga and Saraswati, the culture of Sarala is an amalgamation of three principal Hindu cults namely Vedic, Tantrik and Vaishnavite. It is one of the eight most famous Shakta shrines of Odisha. The main idol, carved out of stone is of eight-armed keeping her right feet on the lion in Mahinsha Mardini posture. It was constructed by the legendary Bhauma Kings in the 8th Century. The place has a legendary association with sage Parshuram, the son of sage Yamadagni .Thus, this place is of high historical importance as a centre of Parshuram cult. Puran describes that Parshuram, the sixth incarnation of Lord Vishnu, engraved the deity by his arrow and worshiped her for wisdom and power. It is also associated with the first epic poet of Odisha, Adikavi Sarala Das of 15th Century AD.

## FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1<sup>st</sup> phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15<sup>th</sup> July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly

added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Bishnupada Sethi, IAS, Directorate of Census Operations, Odisha. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)  
Registrar General &  
Census Commissioner, India

New Delhi.

## PREFACE

The District Census Handbook (DCHB) compiled by the Census Organization is one of the most valuable publications of the Census. The demographic data presented will serve the interests of the data users. 2011 Census has been completed successfully through a vast army of trained enumerators. It is to mention here that modern census is no more confined to mere counting of heads, it is, as it were, a kind of stock-taking of the nation's human resources. Information of every individual besides a host of other activities has been collected. Thus, it has become an indispensable instrument of making policy for development and planning often referred to by the planners, data users, scholars and people from different disciplines and aims at presenting a complete picture of socio-economic and cultural settings.

The District Census Handbook was first introduced as an auxiliary to 1951 Census and appeared as a State Government publication in more comprehensive and ambitious form. As per the instructions, the Director of Census had the responsibility of providing the Census data on PCA as well as non-Census socio-economic and administrative statistics and village and Town Directory for this publication which was the responsibility of the state Government. In 1951 and 1961 it was published in one volume. During 1971 the DCHB series were planned in three parts. Part A related to Village and Town Directory, Part B to Village and Town PCA and Part C comprised of analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages.

During 1981 census DCHB was published in two parts. Part A related to village and Town Directory whereas Part B was containing Village and Town wise PCA. Some new features along with the restructuring of the formats of village and Town Directory were introduced in the DCHBs.

The manner of presentation of DCHB of 1991 Census was by and large the same as followed during 1981 Census. However the format of PCA was restructured slightly for the benefit of data users. Nine-fold industrial classification of main workers was presented instead of four-fold industrial classification as was done during 1981 census. In addition to this, the population in the age group 0-6 with sex break-up was included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate.

The most important changes during 1991 census were the presentation of data at the Community Development Block level instead of traditional pattern of Police Station level.

The DCHB presentation during 2001 census was almost in same manner as was during 1991 census. It was more informative and exhaustive in terms of coverage and content. Some more information was collected through Village Directory. Again the PCA was restructured during 2001 Census. Four-fold industrial classification of both main workers and marginal workers were presented separately instead of nine-fold industrial classification of main workers, which was done only during 1991 census. The eight digit permanent location codes (PLCN) were assigned to all the villages and towns keeping in view of the future needs. The DCHBs were not published by State Govt. from 2001 census. It was brought out by Government of India and was available in electronic format for the first time during 2001 census.

During 2011 census the coverage of village Directory has been widened by inclusion of a number of new amenities. The information for the village directory was collected from the

Tahasildars and for the town directory it was collected from the Municipal Commissioners of Municipal Corporations and Executive Officers of Municipalities and NACs.

All steps have been taken to remove the discrepancies but the existence of some errors cannot be ruled out. The presentation of DCHBs is almost in the same pattern as was during 2001 Census. It is presented CD Block wise in two parts in two separate volumes. Part A contains Village and Town directory & Part B contains Village and Town wise Primary Census Abstract. One of the most important inclusions in the presentation of data in PCA is the data for marginal workers which has been presented in two separate categories i.e. persons worked for a period of 3-6 months and less than 3 months.

In 2011 Census, MDDS (Meta Data and Data Standard) code assigning a continuous code number to all the districts, sub-districts, Towns and Villages of the country has been introduced.

It is hoped that this publication will help the data users, planners, administrators in preparation of micro-level planning.

I must express my deep gratitude to Dr. C. Chandramouli, IAS, Registrar General and Census Commissioner, India for his timely guidance and support for bringing out this publication. I am also thankful to Shri R. C. Sethi, Ex- Addl. Registrar General, Shri Deepak Rastogi, present Addl. Registrar General and officers and staff of Census Division, D. P. Division, S. S. Division, Map Division and Printing Division for their able assistance and support in completing this publication.

I am grateful to Shri B.K. Pattnaik, IAS, Ex Chief Secretary and Shri J. K. Mohapatra, IAS, Present Chief Secretary to Govt. of Odisha, Dr. Taradatt, IAS, Additional Chief Secretary, R & DM Department and Shri R. K. Sharma, IAS, Ex Commissioner-Cum-Secretary, R & DM Department, Govt. of Odisha for their timely guidance and help in conduct of 2011 Census.

I must place on record my deep appreciation and thanks to the Departments of Govt. of Odisha, Heads of Departments, Collectors, Municipal Commissioners, District level officers, Tahasildars, Block Development Officers, Executive Officers of Municipalities and Notified Area Councils for their active co-operations and help for which this voluminous work could be possible.

In my office, I am thankful to all the Officers and the staffs, particularly Shri Chittaranjan Mohanty, Consultant for diligence and zeal shown by them in this important assignment. Its expeditious preparation has placed a heavy burden on all of them. I am deeply obliged to each of them.

## **HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK**

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i)-Status and Growth History of towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

-----

## **BRIEF HISTORY OF THE DISTRICT**

Jagatsinghapur was a mediaeval terminology famous in the history of Odisha, remarkably known as Hariharpur during the advent of East India Company. The place is predominantly recognized due to its existence situating to the close proximity of river Mahanadi and the Bay of Bengal heralded many eventual episodes and memorable heritage on the annals of mankind.

Enriched with glorious cultural heritage Jagatsinghapur district formed on 01.04.1993 vide Govt. of Odisha notification No. 14218/R dated 27.03.1993 and EOG No. 459 dated 01.04.1993. Before that date, it was a part of the erstwhile Cuttack district. Jagatsinghapur district is surrounded by Bay of Bengal in the East, Cuttack district in the West, Kendrapara on the North and Puri district in the South.

History of Jagatsinghapur comprises the conglomeration of Hindu, Muslim, Maratha and British realms. The East India Company established its trading Arsenal at Hariharpur in 1600 and captain Bruton administered the place till 1633. The Maratha Administration kept the place under their jurisdiction and appointed Jagat Singh in 1748 to collect revenue. He collected the Preshkush and Najarana. He remained an unchallenged and uninterrupted administrator for a long period. The place was converted from 'Hariharpur' to 'Jagatsinghapur' after the name of Jagat Singh since 1786.

For many decades history of Odisha has gorgeously rejuvenated by the cultural heritage, political humility, literacy acclamation and proficient proliferation in the realm of art, architecture, culture, sculpture, and by the glorious achievement of brightest luminaries that present and was prevalent in Jagatsinghapur.

Jagatsinghapur is situated in the Eastern hemisphere, stretching along hinter land, seliferous soils and marine boundaries. The District enjoys a temperate climate and prone to cyclonic rainfalls during the monsoons. The maximum temperature of the district is about 38° Celsius and minimum temperature is about 12° Celsius. The average rainfall of the district is 1765 mm.

Glory is the land when its heritages are gloriously eglowed throughout the lifespan of mankind. The hoary past of Jagatsinghapur synchronized with the humble presence of Odisha. The district owes a very rich cultural heritage in past. Sarala Das, a great pattern of Odia literature and author of Sarala Mahabharat took birth in this district and developed Odisha's literature. Though Odia literature existed in oral form from a very early date the origin of Odia written literature can be traced to be the 1<sup>st</sup> part of 15<sup>th</sup> Century A.D. which took a concrete shape in the later part of the 15<sup>th</sup> Century with the Sarala Das's Mahabharat. The great Sarala Temple is a sign of sacredness and Paradip port, Nehru Bungalow are some of the historical places in the district.

## **Administrative Set up**

Jagatsinghapur is one of the coastal districts of Odisha. It is situated at a distance of 74 Kms from state headquarters Bhubaneswar and linked with both road and rail.

The Collector and District Magistrate is the administrative head the district. For smooth running of administration, he is assisted by Additional District Magistrate, Sub-Collectors, Block Development Officers, Tahasildars, Deputy Collectors, and other Officers.

The district Jagatsinghapur is constituted of one Sub-Division with the same name. A Sub- Collector is in charge of the Sub-Division. For the convenience of revenue administration, the district is divided into 8 tahasils namely Kujang, Tirtol, Balikuda, Jagatsinghapur, Ersama, Naugon, Raghunathpur, Biridi with one Tahasidar in charge of each tahasil. For development of rural areas consisting of 1294 villages in 194 Gram Panchayats, the district is divided into 8 Community Development Blocks with one Block Development Officer in charge of each Block. The Community Development Block wise number of Panchayats and villages is given below.

Sl. No.	Name of CD Blocks	No. of Gram Panchayats	No. of villages
1	Kujang	27	174
2	Tirtol	27	249
3	Balikuuda	30	237
4	Jagatsinghapur	29	166
5	Ersama	25	210
6	Naugon	16	90
7	Raghunathpur	19	87
8	Biridi	21	81
	Total	194	1294*

\*Including two villages declared as CT (Census Town)

For maintenance of law and order, the district is divided into 10 Police Stations viz Paradip, Kujang, Tirtol, Balikuda, Jagatsinghapur, Ersama, Naugon, Abhayachandanpur, Biridi and Paradip Lock.

There are two statutory towns namely Jagatsinghapur Municipality and Paradip Municipality. In order to look after the developmental activities in the urban areas of the district, one Executive Officer for each town has been appointed. Besides two villages Paradipgarh and Krushnanandapur are declared as non-statutory towns i.e. Census towns during 2011 Census.

## **Jurisdictional changes**

During the decade 2001-2011 the Govt. of Odisha with an intention to provide the facility of revenue administration to the people at their close proximity, increased the number of tahsils of 2001 Census at par with the number of CD Blocks. In addition to existing four tahsils i.e. Kujang, Tirtol, Balikuda and Jagatsinghapur four new tahsils namely Ersama, Nuagaon, Raghunathpur and Biridi were created during 2008. Thus, total number of tahsils during 2011 census is 8. As per Govt. of Odisha notification No. DRC II-11/08- 14913/R & DM dt. 29.03.2008 Raghunathpur Panchayat Samiti area coming within Jagatsinghapur tahasil consisting of Raghunathpur Panchayat Samiti area coming within Jagatsingpur tahasils, Biridi tahasil consisting of Biridi Panchayat Samiti area coming within Jagatsingpur tahasil, Nuagaon tahasil consisting of Nuagaon Panchayat Samiti area coming within Balikuda tahasil and Ersama tahasil consisting of Ersama Panchyat Samiti area coming within Kujang tahasil were formed. Similarly for administrative convenience in addition to existing 7 Police Stations, 3 new Police stations i.e. Abhayachandpur, Biridi and Paradip lock Police Stations were created. Thus during 2011 Census there became 10 Police stations within the district. As regards number of villages, during 2001 Census there were 1288 villages in the district. But due to creation of 5 new villages, 2 villages in Ersama Police Station, one in Tirtol Police Station and 2 in Jagatsinghapur Police Station and transfer of one village Sanawoubarei from Gobindpur Police Station of Cuttack district to Biridi Police Station and declaration of two villages, Paradipgarh of Paradip lock Police Station and Krushnanandapur of Tirtol Police Station as Census towns the total number of villages during 2011 Census is 1292, out of which 69 villages are un-inhabited.

## **District Highlights – 2011 Census**

- Jagatsinghapur is the 30<sup>th</sup> district in terms of size and 19<sup>th</sup> in terms of population.
- Jagatsinghapur is the 16<sup>th</sup> urbanised district in state having only 10.20 percent of its population live in urban areas as against 16.69 percent of state's population living in urban areas.
- In terms of population per Sq. Km Jagatsinghapur is 2<sup>nd</sup> densely populated district in the state.
- Jagatsinghapur has 21<sup>st</sup> rank in terms of sex ratio in the state.
- There are 69 uninhabited villages in the district whereas 5 villages are having a population of more than 5000 each.
- Gandakipur is the most populated village having 5925 populations in the district.
- Tirtol police station is having highest number of villages (312) in the district and Paradip police station is having the lowest number of villages (6) in the district.

## Important Statistics

		State	District

## **Section - I**

# **Primary Census Abstract (PCA)**

## **Brief Note on Primary Census Abstract**

### **Introduction:**

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite of several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

### **2. Population Enumeration - Census 2011:**

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28<sup>th</sup> February, 2011 along with a revisional round from 1<sup>st</sup> March, 2011 to 5<sup>th</sup> March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11<sup>th</sup> September, 2010 to 30<sup>th</sup> September, 2010 along with a revisional round from 1<sup>st</sup> October, 2010 to 5<sup>th</sup> October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

### **3. Quality Assurance:**

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their states/Uts. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception

was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

#### **4. Primary Census Abstract:**

The Primary Census Abstract which is important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

#### **5. Level of Presentation of PCA data in District Census Handbooks:**

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract -District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes -District/C.D. Block/Town.
4. Village Primary Census Abstract -C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

## **6. Area Figures:**

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.

---
